

September 2021

**OVERVIEW:**

Dear behavioral health providers,

We are so excited to announce our collaboration with Unite Us. Unite Us offers behavioral health providers a free care coordination platform to address Aetna members' social and behavioral health needs. Aetna Better Health of Louisiana will leverage the care coordination platform to securely send electronic referrals to our in-network behavioral health providers for appointments. This process allows for more efficiency and the trackability of which members are fulfilling their appointments. We are truly excited to share our vision for sending our valued providers referrals in an expeditious and accountable manner.
