Effective Date:	6/20/2025	Last Review Date:	5/21/2025
Applies to:	<input checked="" type="checkbox"/> Illinois <input checked="" type="checkbox"/> Florida Kids	<input checked="" type="checkbox"/> New Jersey <input checked="" type="checkbox"/> Pennsylvania Kids	<input checked="" type="checkbox"/> Maryland <input checked="" type="checkbox"/> KY PRMD

Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for Qfitlia under the patient's prescription drug benefit.

Description:

FDA-Approved Indication

Qfitlia is indicated for routine prophylaxis to prevent or reduce the frequency of bleeding episodes in adult and pediatric patients aged 12 years and older with hemophilia A or B with or without factor VIII or IX inhibitors.

All other indications are considered experimental/investigational and not medically necessary.

Applicable Drug List:

Qfitlia

Policy/Guideline:

Documentation

Submission of the following information is necessary to initiate the prior authorization review:

Initial requests: Chart notes, lab tests documenting all of the following (where applicable):

- Severe factor VIII (factor VIII level of <1%) or IX (factor IX level of ≤ 2%) deficiency.
- Baseline antithrombin (AT) activity (<60%).
- Baseline hepatic assessments.

Continuation requests: Chart notes documenting benefit from therapy (e.g., reduced frequency or severity of bleeds).

Prescriber Specialties

The medication must be prescribed by or in consultation with a hematologist.

Coverage Criteria

Hemophilia A and Hemophilia B

Authorization of 12 months may be granted for hemophilia A and hemophilia B when ALL the following criteria are met:

- Member is 12 years of age or older.
- Member has severe factor VIII deficiency (defined as factor VIII level of <1%) or severe factor IX deficiency (defined as factor IX level of ≤ 2%).

Coverage Policy/Guideline

Name:	Qfitlia	Page:	2 of 2
Effective Date:	6/20/2025	Last Review Date:	5/21/2025
Applies to:	<input checked="" type="checkbox"/> Illinois <input checked="" type="checkbox"/> Florida Kids	<input checked="" type="checkbox"/> New Jersey <input checked="" type="checkbox"/> Pennsylvania Kids	<input checked="" type="checkbox"/> Maryland <input checked="" type="checkbox"/> KY PRMD

- Member must be using the requested medication for routine prophylaxis to prevent or reduce the frequency of bleeding episodes.
- Member will not use the requested medication to treat breakthrough bleeding.
- Member does not have co-existing coagulation disorders (other than hemophilia A or B).
- Member does not have a history of arterial or venous thromboembolism, significant valvular disease or atrial fibrillation, or co-existing thrombophilic disorder (e.g., Factor V Leiden mutation).
- Member does not have a history of symptomatic gallbladder disease.
- Member does not have a history of or is planning to undergo immune tolerance treatment.
- Member does not have the following laboratory assessments at baseline:
 - Antithrombin (AT) activity < 60%.
 - Alanine transaminase (ALT) and/or aspartate aminotransferase (AST) greater than 1.5 times the upper limit of normal (ULN).
- Member does not have clinically significant liver disease.
- Member will not use the requested medication in combination with Alhemo, Hemlibra, or Hympavzi.
- Member has not previously received treatment with a gene therapy product (e.g., Beqvez, Hemgenix, Roctavian) for the treatment of hemophilia A or B.
- Prophylactic use of bypassing agents, factor VIII products, and factor IX products will be discontinued no later than 7 days after the initial dose of Qfitlia.
- Provider attests that AT activity and liver enzymes will be monitored per the protocol outlined in the prescribing information.

Continuation of Therapy

Authorization of 12 months may be granted for continued treatment in members requesting reauthorization for an indication listed in coverage criteria section when ALL the following are met:

- Member is experiencing benefit from therapy (e.g., reduced frequency or severity of bleeds).
- Member is not using the requested medication in combination with bypassing agents, factor VIII products (e.g., Advate, Adynovate, Eloctate) or factor IX products (e.g., Alprolix, Ixinity, Rebinyn) for prophylactic use.

Approval Duration and Quantity Restrictions:

Initial and Renewal Approval: 12 months

Quantity Level Limit: Reference Formulary for drug specific quantity level limits
