Aetna Better Health® of Texas

CPT® II Code Incentive Program

Beginning **November 12, 2024**, Aetna Better Health of Texas will offer reimbursement for the utilization of Current Procedural Terminology (CPT®) Category II codes related to Pre- and Postnatal Care (PPC) and Controlling High Blood Pressure (CBP). You will have the opportunity to earn an additional \$25 by adding CPT® II codes to claims.

What are CPT® II Codes?

CPT® II codes are supplemental tracking codes that can be used for performance measurement to help track the delivery of quality care. The codes also simplify how performance measures are reported and eliminate the need for chart abstraction. Providers can use these codes to report specific services that contribute to positive outcomes and high-quality care. For more information see page 2 with additional details.

Benefits

Using proper CPT® II Codes can help streamline administrative processes and close gaps in care like poorly controlled blood pressure. The CPT® II Codes were developed by the American Medical Association (AMA) and improve the quality of care through Healthcare Effectiveness Data and Information Set (HEDIS®) performance measures. Aetna Better Health® is pleased to offer this CPT® II Code incentive program to lessen the burden on our healthcare providers while closing gaps in care. "Health Happens Together!"

Your partner in providing quality healthcare,

Kathleen Thompson
Quality Director, Aetna Better Health® of Texas
